## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-8, drawn to an agent.

Group II, claims 9-24, drawn to a diacetal composition and polyolefin nucleating agent.

4. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: while it is recognized that there is a technical relationship between the Groups set forth above in that the agent containing (B1) a C<sub>6</sub> to C<sub>32</sub> saturated or unsaturated aliphatic alcohol or (B2) a C<sub>6</sub> to C<sub>32</sub> saturated or unsaturated aliphatic carboxylic acid having at least one hydroxy group per molecule is common to the Groups, it is the examiner's position that this technical relationship does not amount to a special technical feature because the agent fails to define a contribution over prior art. The evidence for this is found in U.S. Patent no. 4,927,739 which exemplifies a composition with dibenzylidene sorbitol and 12-hydroxystearic acid (col. 12, lines 47-53) and in U.S. Patent no. 6,342,210 which teaches that gelling agents include C<sub>10</sub>-C<sub>40</sub> straight chain alcohols such as stearyl alcohol, hydroxy stearic acid, and dibenzylidene sorbitol (col. 13, line 66 to col. 14, line 7) which are obviously used in

mixtures given that it is obvious to combine two ingredients, each of which is targeted by the prior art to be useful for the same purpose.

5. A telephone call was made to James E. Armstrong, IV on 5/23/2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

7. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

8. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
